The Open Water Foundation (OWF) has invested research and development funds to implement cross-jurisdictional information river basin information websites. OWF is seeking funding that will be used to develop software tools and datasets and implement river basin websites. Each website is a community resource that integrates data and information from multiple public sources. Funding will be treated as matching funds to allow pursuing grants that require match. The Poudre Basin Information website is the initial focus and similar websites for other river basins in Colorado also will be implemented.
